

EXTENSION ARM

EXTRACTION ARM Ø160 AND Ø200 MM

Geovent Wing arm is the classic extraction arm. It was our first extraction arm, and was manufactured the first time in 1968. With more than 10,000 manufactured units, it is a very tested construction, which is improved through the years, and it is suitable for all kinds of point extraction e.g. welding fumes, oil fog, steams and dust. The wing arm can be extended up to 4.5, 5.5, 6.0, 6.5, 7.0 or 8.0 m by means of extension arms.

As accessory the wing arm can be equipped with a directly connected fan MSF 200 0.75kW in either 220V or 380V.

Description

Ceiling bracket - 360° turn able: Powder enamel steel with brass bearing and VA rubber packing ring.

The arm has inner carrying arms with 3 stable self adjusting friction couplings, which ensures that the extraction arm is kept in the wanted position.

Hood: Light weight aluminum epoxyenamel with an integrated handle.

Carrying arms: 25 x 25 mm Aluminum pipe connected via knee joint with friction discs and pull springs.

Hose:

Black Weld in strong PVC/ polyester web with steel spiral. Temperature from -10°C to +80°C (Short +110°C).

Net weight: 11 kg – 16 kg depending on model.
